

INSTRUCTIONS: Fill out the following form and upload the form to your GitHub repository.  
Choose only one of the corresponding numbers in your answer for sections A-E.  
Answer the questions in section F in sentence form.

A. Code Quality

0 - Nothing - No submission

1 - Below Expectations - Code renders but the code is unreadable

2 - Meets Expectations - Good formatting and uses naming conventions but can be improved

3 - Exceeds Expectations - Code is exceptionally clean and best practices are used

Your Answer: 2

B. Content

0 - Nothing - No submission

1 - Below Expectations - Content not related to assignment or project

2 - Meets Expectations - Content is related to assignment or project and gets the point across

3 - Exceeds Expectations - Content is exceptionally detailed and well put together

Your Answer: 3

C. Layout / Organization

0 - Nothing - No Submission

1 - Below Expectations - Long codes with no divisions or random code layout

2 - Meets Expectations - Code that is modular and divided into section declarations;  
subprograms

3 - Exceeds Expectations - Code is exceptionally well organized.

Your Answer: 3

D. Comments/Commits

0 - Nothing - No Submission

1 - Below Expectations - Excessive, unnecessary, and irrelevant remarks

2 - Meets Expectations - Comments identify authorship and code's intention

3 - Exceeds Expectations - Comments and documentation are clear succinct; wizardry points  
are explained

Your Answer: 2

E. Rendering

0 - Nothing - Page does not load or render

1 - Below Expectations - Page renders, but has errors and/or has apparent design issues

2 - Meets Expectations - Page renders and produces no errors

3 - Exceeds Expectations - Page renders and displays properly for multiple screen sizes and  
browsers

Your Answer: 3

F. Self Evaluation Questions:

1. How much time did you spend on this assignment/project?

I spent around 4 hours watching the tutorials, following along, adding new content, and adjusting the styling according to the assignment requirements.

2. How difficult did you feel this project was? Easy, moderate, difficult?

Most of it was moderate with some elements like media queries and modals being difficult because I have had very little experience with them.

3. What challenges did you come across while working on this project?

I got some tutoring for media queries as I have struggled with them before and I have very little experience with them. After a session I feel a lot more confident in using them and what they do. I also struggled with making the modal responsive but a specific size. I got it somewhat what I wanted but can definitely improve.

4. What things would you like to learn more about after having worked on this assignment?

I would love to learn more about modals and how to properly size them for responsive design, especially with an image included. I also wouldn't mind going over media queries more.
