	Not Completed - 0	Does Not Meet Expectations - 1	Meets Expectations - 2	Exceeds Expectations - 3	Total Score
Commits	No commits were made during the project timeline	Very few commits are made and have poor structure.	Well structured commits were made throughout the project with very few errors.	Well structured commits were made at the right times with no clear errors.	
Layout/Design	Code does not function well - page does not load or loads but is hugely lacking design elements.	Page loads, but does not meet the requirements. Poor layout, clashing colours, boring or buys layout. Some elements are easy to find but not all.	Page loads easily and meets the project requirements. Layout is attractive and usable. All important elements are easy to locate.	Page easily loads and exceeds the project requirements. Layout is exceptionally attractive and usable. All important elements are easy to locate. Design is consistent and graphic design elements are clearly present.	
Organization of Code	No organization attempts were made	Little effort was made in organization with little understanding of code specificity and how it plays a part in successful code hierarchy.	Code is organized successfully with a good understanding of code specificity and how it plays a part in successful code hierarchy.	Code is organized exceptionally well with outstanding understanding of code specificity and how it plays a part in successful coding. All sections are clearly in order and methodically placed.	
Content	No code is available	The bare minimum was met. Code content is just enough to populate required sections. Some grammar and spelling mistakes are present.	Code content is full of detail and effort was put into filling out required sections. No grammar or spelling mistakes are present.	Code content goes beyond requirements, effort is obvious and the attention to detail is apparent. No spelling or grammar mistakes are present.	
Validation/Testing	Code was not tested - many errors present.	Code might have been tested, but errors still exist.	Code was tested and errors were fixed.	Code was clearly tested and no errors exist. Clear priority and it can be seen in code or commits.	
Creativity	No creative liberties are expressed.	Little effort was made in expressing creativity - does not meet project requirements and required elements may be missing.	Effort was put into creativity. CSS clearly shows effort into making project unique such as whitespace, typeface, indentation and effects.	Thoughtful effort was put into project and the layout exceeds what was required. Project shows taken initiative in designing a unique element on more than one front such as whitespace, typeface, indentation and effects.	
Reflection Questions	No reflection completed	Reflection not complete, lack of information and clearly done in a rush.	Reflection accurately portrays students experience with all questions being met with a complete answer.	Reflection is well thought out, specific points are made, more than single sentences are used. Points are fully fleshed out. Obvious effort and time went into the response.
